Exterior Design

Great looks are just the beginning. The AVANZA combines sophisticated, urban styling with a new, quieter, more fuel-efficient engine. The style, agility and performance takes the 7-passenger MPV to a whole new level.

Front design

The inverted trapezoid-shaped front grille gives the front face of the AVANZA a wider, more stable appearance.

Outside rear view mirror (ORVM)

These large electric motor-equipped mirrors are easy to adjust, to provide good visibility.

Alloy wheel design

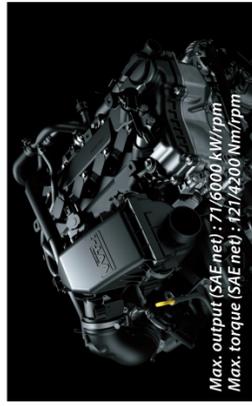

The alloy wheels have a simple design with spokes radiating from the hub, giving an agile and sporty impression.

Rear design

The rear combination lamp creates a sense of continuity with the surface of the back door, helping to convey a wide stance.

Performance

Max. output (SAE net) : 71/6000 kW/rpm
Max. torque (SAE net) : 121/4200 Nm/rpm

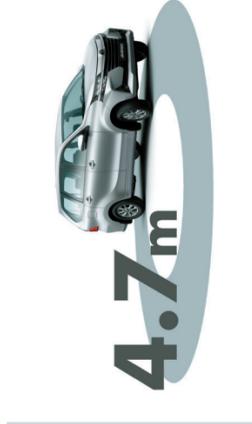

1.3-liter Dual VVT-i twin-cam engine (1NR-VE)

The new engine with Dual VVT-i excels in both performance and environment friendliness. The engine combines higher output and torque with quieter operation, greater fuel efficiency, and reduced exhaust emissions.

Suspension

AVANZA combines MacPherson strut front suspension and 5-link coiled spring rear suspension with lateral rods. Improvements include meticulous optimization of alignment and spring constant to ensure handling stability and riding comfort.

Small turning radius

Despite its long wheelbase, the AVANZA's turning radius is only 4.7 meters, making it superbly easy to maneuver on narrow or crooked streets.

Interior Design

The AVANZA's interior aims for a more assertive look, with design improvements of the center console and peripheral switches of the instrument panel. The meters enhance the sporty appearance of the cockpit.

Tiltable steering wheel

Tiltable steering wheel for a comfortable driving position.

Meters

The triple-meter design has a look of heightened precision and delivers superior visibility.

Audio system

Display audio system with a 6.8-inch WVGA capacitive touch screen comes with AM/FM/USB/AUX, plus a DVD player and Bluetooth® connectivity. All passengers can enjoy a more natural, high resolution sound.

Air conditioning

The dual air-conditioning system efficiently sends air from the front to rear, bringing comfort to all passengers onboard. Temperature for the front and rear can be adjusted independently.

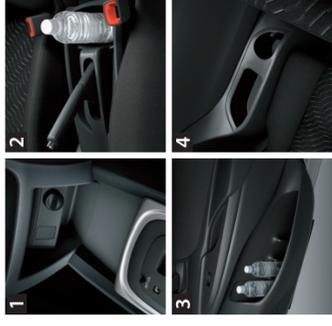

Comfortable seating for 7 passengers

Seven passengers can sit comfortably in the three rows of seats with comfortable seatbacks and generous legroom.

One-touch tumble seat

The one-touch tumble mechanism allows easy access to the third-row seats.

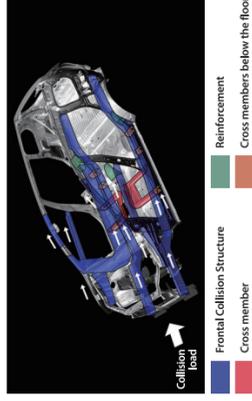

- 1 Front console pocket
- 2 Rear console box (for longer objects and up to three CDs)
- 3 Door trim pockets
- 4 Third-row deck trim storage space & bottle holder

Luggage space

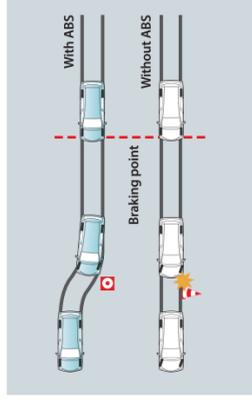

Flexible seat configuration makes it simple to create more luggage space. The rear door opens wide and tall to make loading and unloading easier.

Safety

Enhanced body rigidity

Steel plate with high tensile strength is used throughout the monocoque body, to meet the competing demands for both lighter weight and greater rigidity. In addition, the side impact beams help mitigate the impact of crash energy on occupants in the event of a side collision.

Anti-lock Brake System (ABS) with Electronic Brake-force Distribution (EBD)

Anti-lock Brake System (ABS) with Electronic Brake-force Distribution (EBD) helps maintain vehicle stability and driver control when braking.

Seatbelts / Child restraint system

All seatbelts are equipped with 3-point ELR seatbelts. Second row seats are provided with ISOFIX anchors for child seat installation.
